CREATE SUCCESS WITH CUSTOM-CRAFTED SOFTGELS

InnovaGel is your go-to partner for nutritional supplements and FDA-certified OTC pharmaceutical manufacturing. Our seasoned team of professionals has decades of experience in developing and manufacturing softgel capsules. We look forward to combining our technical capabilities with your vision to bring winning products to life – quickly and cost effectively.

Innovative Technology

As our name suggests, we focus on innovation when it comes to softgel production and technology. From simple oils to complex suspensions, our manufacturing processes are optimized to deliver consistent quality softgels. We focus on uniformity and stability of complex suspensions, shell and seam strength to avoid leakers, and prevention of oxidation throughout the manufacturing process. Our scientific and technical team are ready to help create innovative products that serve consumers' needs, while setting your brand apart from the competition. Our current focus is on the following product categories:

-  Omega-3 essential fatty acids in all forms, concentrations, and ratios
-  Innovative Omega-3 blends with other proprietary ingredients
-  Single and multi-nutrient blends
-  Herbal blends
-  FDA certified OTC drugs and nutritionals

Experienced and Certified to Serve Your Global Needs

Our state-of-the-art, cGMP-compliant production facility holds all necessary regulatory and compliance approvals to serve your global needs. InnovaGel is EU, NSF, TGA and MSC certified, in addition to being a FDA registered pharmaceutical facility that adheres to strict drug GMPs (21 CFR 210 and 211 compliant).

We have extensive experience in serving the Canadian, South American, European, Middle East, Asian, and Australian markets – either directly or through global brands. InnovaGel is IFANCA-authorized to manufacture Halal Certified Products.

State-of-the-Art Manufacturing Facility

We use high quality softgel machines from Canada and Japan, with customization performed in Switzerland. We utilize crib room tooling organizational controls, and maintain all critical machine components on site. We have implemented proprietary in-process controls throughout manufacturing, including high-resolution microscopes for particle sizing and softgel seam measurement as part of our effort to achieve uniformity of fill and seam strength of shell. Our tumbler drying process eliminates drying variability and enables efficient and cost-effective segregation of defects, as well as assist with highly accurate and quick Root Cause Analysis.

All Shapes - All Sizes

From size 2 oval to size 28 oblong, we can deliver a full range of sizes and shapes to serve your needs. We have twist-offs and cut-offs, and will work with you in making custom dies if called for. We have high speed imprinting as well as laser etching machines – to help brand your softgels. We will deliver the end product you envision!

Customer Centric and Transparent

At InnovaGel, you – the customer – is our priority. We strive to offer the speed and quick turn-around you demand to stay relevant in a dynamic marketplace. We seek to balance the need for speed and quality, while maintaining cost efficiency – all essential parts of gaining consumer loyalty and trust. Our dedication to transparency and responsiveness is integral to developing an open and trusted relationship with you – our customer! How may we be of service?
