

Endress+Hauser expands flow calibration capabilities

New calibration rig at Houston Campus provides superior service for customers.

December 1, 2021 –Endress+Hauser expands its calibration capabilities in the U.S. with a new flow calibration rig located at the company’s recently inaugurated Houston Campus. The rig will service customers’ flowmeters, including those from third-party vendors, and will have expanded line size and flowrate capabilities.

“With the addition of this new flow calibration rig, we will expand our calibration capabilities to cover flowmeter sizes from 1/12” to 12”,” says Kyle Shipps, Endress+Hauser Calibration and Repair Group Manager. “This allows us to better support the installed base of flowmeters in the region, while reducing shipping costs and total turnaround time for our customers.”

Expanding flow calibration capabilities

Endress+Hauser offers accredited calibration both in the laboratory and onsite for their own and other manufacturers’ products, helping customers stay in compliance, while reducing costs and increasing uptime. The Houston Campus, which is ISO 17025 accredited, has been providing flow, temperature and pressure calibration services since it opened in 2020.

The new calibration rig expands flow capabilities to 12” line size and 1,750 gallons per minute and can service Coriolis, (standard and premium calibration), electromagnetic, vortex, ultrasonic in-line, and ultrasonic clamp-on flowmeters.

Adding value to the region

The Houston facility is also offering expedited calibration turn times for certain applications. This includes 24-hour or 3-day expedited calibration returns for customers who need urgent response for critical applications.

The Houston campus also provides cleaning services for customer meters. Many times, meters are brought in from the field or plant and need to be cleaned before they can be calibrated. Endress+Hauser is now able to provide cleaning and calibration, eliminating that extra burden for the customer.

“Endress+Hauser continues to invest in technology and strategies that bring us closer to our customers and the industries that we serve,” adds Shipps. “We are always looking for unique ways to make our customers’ lives easier, so we’re very excited for this new calibration rig, and all the ways it can be used to provide superior service to the region.”

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of over 2.6 billion euros (2.89 billion U.S. dollars) in 2020 with a total workforce of 14,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Own sales companies in 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H. Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry’s digital transformation. 8,000 patents and applications protect the Group’s intellectual property.
